FAMINE OF DRUGS

War Has Resulted in Decided Boosts in Price of Even Simplest Remedies.

This country is threatened with a drug famine. Some of the drugs which are fast becoming unobtainable, except at almost prohibitive prices, are sim ple demedies, widely used, such as quinine, glycerine, borax and alum. The cessation of shipments of these

products from European countries is causing a drug famine hitherto unknown in this country. There has been a gradual advance ever since the war started, but only recently has the situation become alarming. Within the

war started, but only recently has the situation become alarming. Within the last few weeks some of the most wide ly used remedies have doubled, and others have tripled and quadrupled in price.

Quinine, which formerly sold at 20 cents an ounce, wholesale, is quoted today at 40 cents, and brokers in New York are paying as high as 50 cents for it for export trade. Epsom salt has advanced 1½ cents a pound to 5 cents. Glycerine has practically doubled in price, having jumped from 19 cents a pound to 35, and borax and alum, two almost indespensible household remedies, have doubled and tripled from 3½ cents to 6 ents a pound, and the latter from 2 cents to 6. Cod liver oil, which a year ago was procurable at \$150 cents and the latter from 2 cents to 6. Cod liver oil, which a year ago was procurable at \$150 cents and the latter from 2 cents to 6 at 390 cents of the former having advanced of yesterday, \$4,000 worth sold at \$945 cents and the latter from 2 cents to 6 cod liver oil, which a year ago was procurable at \$150 cents and the latter from 2 cents to 6 at 390 cents of the sales of the day included to columbla Nat. Ban Columbla Na cents a pound to so, and corax and alum, two almost indespensible household remedies, have doubled and tripled in price, the former having advanced from 3½ cents to 6 ents a pound, and the latter from 2 cents to 6. Cod liver oil, which a year ago was procurable at 35 a barrel, is quoted to day at 590 a barrel, and magnate potash is quoted at 51.50 a pound, as against 3 cents a year ago. Aspirin taolets, which sold before the war at 40 cents a hundred, are selling now at 85 cents, and are almost unobtainable even at this figure, it is stated. Bromide potash has advanced from 15 cents a pound to 31.50. Denatured alcohol has advanced from 32 cents a gallon to 40.

Antipyarine has advanced from 32,60 a pound to 320 a pound, and druggists say it is almost impossible to get it even at this figure, and lanolin, which is largely used in skin remedies, is now quoted at \$1.10 a pound, as against 15 cents a years ago.

"I can see but one thing that will relieve the situation," said James O'Donnell today, "and that is action by Congress that will shut down on the export of these drugs. Europe is 'in desperate need of drugs, of course, and will pay any price. The result is that price levels here will keep pace with those set by Europe just as long as preesnt conditions continue."

Not only has the war greatly increased the demand for drugs abroad, but it has also cut off the supply of certai ndrugs and chemicals which we get from Europe, particularly from Germany it is stated. Aspirin, for instance, is manufactured under a Germany has been entirely cut off, and while the American representatives of the German patent, and a sharp advance in price was felt almost as soon as the war broke out. The supply from Germany has been entirely cut off, and while the American representatives of the German patent holders are manufacturing some aspirin in this country, there has been an increasing scarity of this remedy until today it is almost unprocurable in any quantity.

Reluctant Awakening. The attorneys for the prosecution and defense had been allowed fifteen min-utes each to argue the case. The atutes each to argue the case. The attorney for the defense had commenced his arguments with an aliusion to the old swimming hole of his beyoned days. He told in flowery oratory of the balmy air, the singing birds, the joy of youth, the delights of the cool water—And in the midst of it he was interrupted by the drawling voice of the judge. Judge.

"Come out, Chauncey." he said, "and put on your clothes. Your fifteen minutes are up."—Everybody's.

CONTINUE BOOMS

Most Noticeable Weakness Is Centered in Independent Steel Issues.

NEW YORK, Oct. 5.-The improve ment inaugurated late yesterday in rail-road securities continued today, but the industrial stocks were particularly irregular, with the most notable weak ness centered in the independent steel insues

Traders appeared to give little heed to the announcement of the break in diplomatic relations between Russia and Anglo-French loan, on the other hand

Anglo-French loan, on the other hand, was regarded as an indication of still further bullish activity on the part of the public.

The statement issued late yesterday by President F. N. Eaton, of the American Car and Foundry Company, to the effect that the munition contracts held by the company do not exceed \$7,86,000 and car orders are light, resulted in a sharp break in Car and Foundry stock, which had risen nearly 39 points in two weeks.

sharp break in Car and Foundry stock, which had risen nearly 20 points in two weeks.

The stock opened off five points at 85, but later railled to 82%.

United States Industrial Alcohol, a stock which enjoyed an unusual advance yesterday, cetablished a new high record by advancing three points to 106½, and the stock of the Distillers Securities Corporation, which owns a large block of the alcohol company stock, made a similar gain by selling at 86½.

Motor stocks were prominent with substantial gains. Maxwell advanced three points to 55½: Studebaker, 4½ points, a portion of which was later lost and General Motors recorded an early advance of five points at 365, only to drop later to 350.

Crucible Steel, Lackawanna, and Sloss-Sheffield each opened from 2 to more than 3 points under the previous day's close. They later advanced slightly from these low figures.

While the majority of the gains in the railers were fractional, Canadian Pacific, New York Central, New Haven, and Reading each registered advances of a point or more, and there was further indication of a transfer of activity by certain interests from the industrial to the rail list.

An Ancient Offense.

All Ancient Offense.

A man in the English veteran reserves was called up recently. After a week at his new quarters he was brought up before the officer commanding for not cleaning his rifle one day. Said the officer commanding:
"Hem, you're an old soldier re-enlisted. I see. I suppose it has been many years since you were reprinmended? What was your last offense? Can you remember what it was?"
The old soldier, with irony on account of the repeated assertions of his age, replied: "For not cleanin' me bow an' arrow, sir!"—Pittsburgh Chronicle Telegraph.
